

Product Code : MK-DLS 1000 Series

Displacer Level Switch (MK-DLS 1000 Series)

Top mounted displacer type level switches offer the industrial user a wide choice of alarm and control configurations. These units utilise a simple buoyancy principle and are well suited for simple or complex applications, such as high level alarm or control of multiple pumps and alarms. Displacer switches are both reliable and cost effective.

- Service : Waste Water, Fuel Oil, Chemicals, Effluent etc.,
- Design Temperature : Up to 230^oc
- Design Pressure : Up to 20 Kg/cm²
- Range : Up to 10 Mtrs.
- Float Materials : SS304/SS304L/SS316/SS316L/PVDF
other materials on request
- Connection Size : 3" NB and above
- Connection STD. : As per ASA/BS/JIS (Others On Request)
- Enclosure : Weather Proof IP 65/Ex-Proof
- Switch type and Form : Micro 1 NO+1NC, 5 Amp, 230 VAC

Available Options

Displacer Level Switch With One Level Control Point

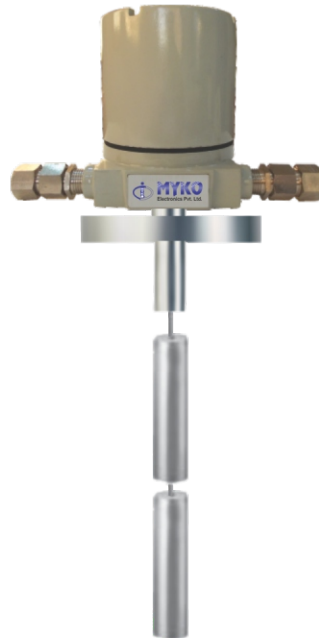

Product Code :
MK-DLS 1000 -1CP

External Cage Type Displacer Level Switch With One Level Control Point

Product Code :
MK-DLS 1000 -1CP-EC

Displacer Level Switch With Two Level Control Points

Product Code :
MK-DLS 1000 -2CP

External Cage Type Displacer Level Switch With Two Level Control Points

Product Code :
MK-DLS 1000 -2CP-EC
